

Assignment-2 Session 21

Question 1: Create a sample Sprint Board in JIRA using the Scrum template and add at least 5 tasks for a "Food Delivery App" sprint.

Answer

Sample Sprint Board

Project: Food Delivery App

Sprint Name: Sprint 5 – Order Management

Task ID	User Story / Task	Priority	Assignee	Status
FD-101	Display Restaurant Menu	High	Developer	Done
FD-102	Place Food Order	High	Developer	In Progress
FD-103	Payment Gateway Integration	High	Developer	To Do
FD-104	Delivery Tracking	Medium	Developer	In Progress
FD-105	User Ratings & Reviews	Medium	Tester	To Do

Sprint Workflow

Product Backlog

To Do

In Progress

Code Review

Testing

Done

Question 2: Write a script for a Daily Stand-up meeting for a team building a new feature in a music streaming app like Spotify.

Answer

Daily Stand-up Meeting

Team Member: QA Tester

What did you do yesterday?

Completed testing of the **Search Music** feature.

Executed 25 functional test cases.

Reported 3 UI defects related to search results.

What will you do today?

Test the **Add to Playlist** feature.

Perform regression testing after developers fix the reported defects.

Update the test execution report.

Any Blockers?

Waiting for the latest build containing fixes for the Search feature.

Need access to the staging server for playlist testing.

Question 3: Simulate a Sprint Planning meeting by listing 3 user stories for a Flipkart-style shopping cart feature and breaking each story into smaller tasks with clear acceptance criteria.

Answer

User Story 1

Story ID: US-101

User Story

As a customer, I want to add products to my cart so that I can purchase them later.

Tasks

- Design Add to Cart button
- Develop Add to Cart functionality
- Create test cases
- Execute functional testing

Acceptance Criteria

- Product is successfully added to the cart.
- Cart count updates immediately.
- Success message is displayed.

User Story 2

Story ID: US-102

User Story

As a customer, I want to update the quantity of products in my cart.

Tasks

- Develop quantity update functionality
- Validate minimum and maximum quantity
- Create test cases
- Execute regression testing

Acceptance Criteria

Quantity updates successfully.

Total price is recalculated automatically.

User Story 3

Story ID: US-103

User Story

As a customer, I want to remove products from my cart.

Tasks

Develop Remove Item functionality

Display confirmation popup

Write test cases

Perform functional testing

Acceptance Criteria

Selected product is removed successfully.

Cart count and total amount update correctly.

Question: After completing a mock sprint for a movie ticket booking app (like BookMyShow), write a brief Sprint Review summary.

Answer

Sprint Review Summary

Sprint: Sprint 4

Project: BookMyShow

Features Delivered

- Movie Search
- Theatre Selection
- Seat Selection
- Booking Confirmation
- Booking History

What Went Well

- All planned user stories were completed on time.
- Critical defects were fixed before sprint completion.
- Regression testing was completed successfully.

Stakeholder Feedback

- Booking process is simple and user-friendly.
- Seat selection screen should load faster.
- Add more payment options in the next sprint.

Question 5: Conduct a Sprint Retrospective for a Zomato-style Restaurant Search sprint.

Answer

Sprint Retrospective

What Went Well

Search functionality was completed within the sprint timeline.

Most defects were identified and fixed before Sprint Review.

What Could Be Improved

Test cases should be prepared earlier during development.

Better communication between developers and testers is needed to reduce duplicate defects.

Action Item for Next Sprint

Schedule regular discussions between developers and testers during development to clarify requirements and identify issues earlier.

Scrum Ceremonies Summary

Ceremony	Purpose
Backlog Grooming	Prioritize and refine user stories.
Sprint Planning	Select user stories and plan sprint work.
Daily Stand-up	Share daily progress, plans, and blockers.
Sprint Review	Demonstrate completed work and gather stakeholder feedback.
Sprint Retrospective	Identify improvements for the next sprint.
