

Assignment-2 Session5

Question 1: List the 7 main phases of the Software Testing Life Cycle (STLC) and write one line describing what happens in each phase for a Login feature like the one in Instagram or Paytm.

Answer

STLC Phase	Description (Login Module Example)
1. Requirement Analysis	Analyze the Login feature requirements such as email/mobile login, password validation, OTP login, and Forgot Password functionality.
2. Test Planning	Prepare the testing strategy, estimate testing effort, assign resources, and define the testing schedule for the Login module.
3. Test Case Design (Development)	Create test cases for valid login, invalid login, blank fields, password validation, and Forgot Password scenarios.
4. Test Environment Setup	Configure the testing environment, browser, database, and test accounts required for Login testing.
5. Test Execution	Execute all Login test cases, compare expected and actual results, and record defects if any are found.
6. Defect Reporting & Tracking	Log defects in the bug tracking tool, assign severity and priority, and track them until they are resolved.
7. Test Closure	Prepare the Test Summary Report, review test results, and confirm that the Login feature is ready for release.

Question 2: For a Flipkart-style Login module, create a table that lists the Entry and Exit Criteria for each STLC phase.

Answer

STLC Phase	Entry Criteria	Exit Criteria
Planning	Requirements document is approved.	Test Plan is completed and approved.
Monitoring	Testing activities have started.	Progress reports and testing status are updated regularly.
Requirement Analysis	Business requirements are available.	Testable requirements are identified.
Test Design	Requirements are finalized.	Test cases and test data are prepared and reviewed.
Implementation (Environment Setup)	Test cases are ready.	Test environment is configured and verified.

STLC Phase	Entry Criteria	Exit Criteria
Test Execution	Build and test environment are available.	Test cases are executed and defects are reported.
Reporting	Testing activities are completed.	Test Summary Report and defect statistics are prepared.
Closure	All testing activities are completed.	Testing is formally closed after approval from stakeholders.

Question 3: Write a Sample Test Plan for the Login Module of a Zomato-like Application.

Answer

Test Plan

Test Plan ID

TP_LOGIN_001

Module

Login Feature

Objective

To verify that the Login module functions correctly with valid and invalid credentials, displays proper validation messages, and provides secure authentication for users.

Scope

In Scope

- Login using Email
- Login using Mobile Number
- Password Validation
- Forgot Password
- Remember Me
- OTP Login

Out of Scope

- ✧ User Registration
- ✧ Payment Module
- ✧ Order Tracking
- ✧ **Resources**

Role	Responsibility
Test Leader	Test planning, review, approval
Tester	Test case preparation, execution, defect reporting
Developer	Fix reported defects

Test Environment

- ✧ Windows 11
- ✧ Google Chrome
- ✧ Microsoft Edge
- ✧ Android Device
- ✧ Test Database
- ✧ Staging Server

Schedule

Activity	Duration
Requirement Analysis	1 Day
Test Planning	1 Day
Test Case Design	2 Days
Environment Setup	1 Day
Test Execution	3 Days
Regression Testing	1 Day
Test Closure	1 Day

Question 4: Design 3 Test Cases for the Login Module of a BookMyShow-style Application.

Answer

TC ID	Test Scenario	Test Steps	Expected Result	Actual Result	Status
TC_001	Valid Login	Enter valid email and password → Click Login	User should successfully log in and reach the Home page	User logged in successfully	Pass
TC_002	Invalid Password	Enter valid email and incorrect password → Click Login	Error message "Invalid Username or Password" should be displayed	Correct error message displayed	Pass
TC_003	Blank Login Fields	Leave email and password blank → Click Login	Validation messages should appear for both required fields	Validation messages displayed correctly	Pass

Question 5: Write a Short Test Summary Report for the Login Module.

Answer

Test Summary Report

Project Name: BookMyShow Login Module

Module Tested: Login

Testing Duration: 3 Days

Test Execution Summary

Item	Count
Total Test Cases	3
Passed	3
Failed	0
Blocked	0
Not Executed	0

Major Issues Found

- No critical defects were identified.
- Login functionality worked correctly with valid credentials.
- Proper validation messages were displayed for invalid and blank inputs.
- Forgot Password and input validation behaved as expected during testing.
