

Assignment-2 Session 24

Question 1: Sign up for a free Jira account, create a new project named "Food Delivery App QA", and add a sample bug titled "Order status not updating after payment."

Answer

Project Details

Project Name: Food Delivery App QA

Project Type: Scrum Software Project

Bug Created

Issue Type: Bug

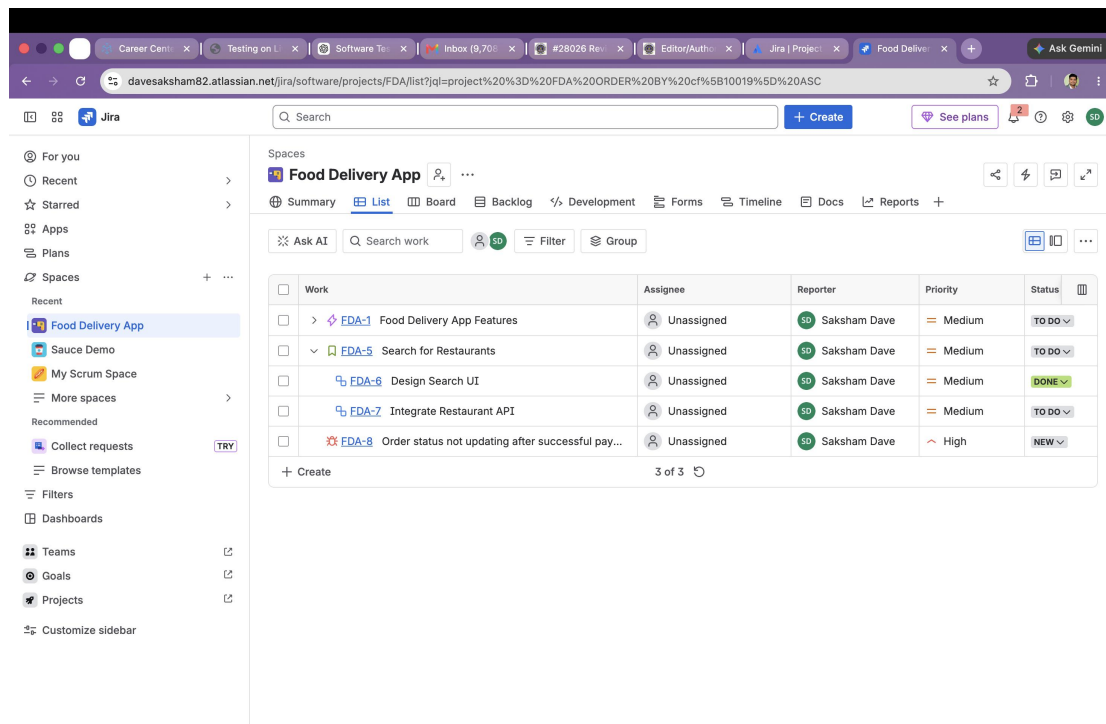

Summary:

Order status not updating after successful payment.

Status:

New

Screenshot

The screenshot shows the Jira project page for 'Food Delivery App'. The left sidebar contains navigation options like 'For you', 'Recent', 'Starred', 'Apps', 'Plans', 'Spaces', 'Recent', 'Food Delivery App', 'Sauce Demo', 'My Scrum Space', 'More spaces', 'Recommended', 'Collect requests', 'Browse templates', 'Filters', 'Dashboards', 'Teams', 'Goals', 'Projects', and 'Customize sidebar'. The main content area displays a list of issues under the 'Food Delivery App' space. The issues are:

Work	Assignee	Reporter	Priority	Status
> FDA-1 Food Delivery App Features	Unassigned	Saksham Dave	Medium	TO DO
FDA-5 Search for Restaurants	Unassigned	Saksham Dave	Medium	TO DO
FDA-6 Design Search UI	Unassigned	Saksham Dave	Medium	DONE
FDA-7 Integrate Restaurant API	Unassigned	Saksham Dave	Medium	TO DO
FDA-8 Order status not updating after successful pay...	Unassigned	Saksham Dave	High	NEW

At the bottom of the table, it says '+ Create' and '3 of 3'.

Question 2

Fill out a defect report in Jira for a bug found in an application.

Answer

Defect Report

Field	Details
Bug ID	BUG-001
Summary	Order status remains "Preparing" even after successful payment.
Application	Zomato
Module	Order Tracking
Description	After completing payment successfully, the order status does not update from "Preparing" to "Confirmed".
Steps to Reproduce	1. Login to Zomato.2. Select a restaurant.3. Add items to the cart.4. Complete payment.5. Open My Orders .
Expected Result	Order status should automatically change to Confirmed after successful payment.
Actual Result	Order status remains Preparing even though payment is successful.
Severity	High
Priority	High
Environment	Android 14, Chrome Browser
Status	New

Question 3

Classify the following bugs based on Severity and Priority.

Answer

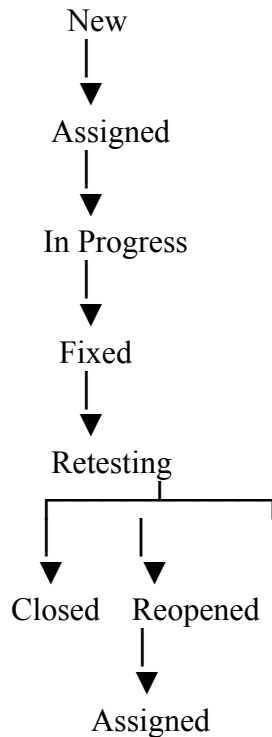

Bug	Severity	Priority	Justification
Payment fails for UPI	High	High	Users cannot complete payments, directly affecting business transactions.
Movie poster image is blurry	Low	Low	This is a cosmetic issue that does not affect core functionality.
App crashes if booking more than 10 tickets	High	Medium	The application crashes, making it a serious defect, but most users do not book more than 10 tickets, so its business priority is moderate.

Question 4

Draw the complete Bug Life Cycle and describe each stage.

Answer

Bug Life Cycle Diagram

Bug Life Cycle Stages

Stage	Description
New	Tester reports a newly discovered defect.
Assigned	The defect is assigned to a developer for investigation.
In Progress	The developer analyzes and works on fixing the defect.
Fixed	The developer completes the fix and provides a new build.
Retesting	The tester verifies whether the defect has been resolved.
Closed	The tester confirms the fix, and the defect is closed.
Reopened	If the defect still exists, it is reopened and reassigned to the developer.

Question 5

Fill out a sample defect template for a bug noticed in a social media application.

Answer

Defect Report

Field	Details
Bug ID	BUG-002
Application	Instagram
Module	Story Upload
Summary	Story upload remains stuck at 99%.
Description	Uploading an image as a story gets stuck at 99% even with a stable internet connection.
Preconditions	User is logged in and connected to the internet.
Steps to Reproduce	1. Open Instagram.2. Tap Your Story .3. Select an image.4. Tap Share .
Expected Result	Story should upload successfully and become visible to followers.
Actual Result	Upload progress stops at 99%, and the story is not published.
Severity	Medium
Priority	High
Environment	Android 14, Instagram Latest Version
Status	New
Attachment	Screenshot/Screen Recording (if available)

Difference Between Severity and Priority

Severity	Priority
Measures the impact of a defect on the application.	Measures how urgently the defect should be fixed.
Decided mainly by the Tester/QA.	Usually decided by the Project Manager, Product Owner, or Business Team.
Focuses on technical impact.	Focuses on business impact and release planning.
