

Assignment-2 Session 23

Question 1: Log in to your JIRA test project and create a new test case for the "Add to Cart" feature found in shopping apps like Flipkart or Myntra, including a clear summary and description.

Answer

Test Case Details

Issue Type: Test (or Task, if Test issue type is unavailable)

Summary:

Verify that a user can successfully add a product to the shopping cart.

Description:

Feature: Add to Cart

Objective:

Verify that clicking the **Add to Cart** button adds the selected product to the shopping cart successfully.

Preconditions:

- User is logged into the application.
- Product is available in stock.
- Internet connection is active.

Test Steps:

1. Open the application.
2. Login with valid credentials.
3. Search for a product.
4. Open the product details page.
5. Click **Add to Cart**.
6. Open the shopping cart.

Expected Result:

The selected product should appear in the shopping cart, and the cart count should increase by one.

Question 2: Link your newly created "Add to Cart" test case to an existing User Story or Epic in JIRA.

Answer

Linked Issue

Epic: Food Delivery App Features

User Story:

"As a customer, I want to add products to my shopping cart so that I can purchase them later."

Relationship:

Test Case → Tests → User Story

Question 3

Add at least two relevant attachments to your "Add to Cart" test case.

Answer

Attachments Added

Attachment	Purpose
Cart_UI.png	Screenshot of the Shopping Cart screen.
Test_Data.xlsx	Sample product names, quantities, and expected cart results.

Question 4

Write three acceptance criteria for the "Add to Cart" test case.

Answer

Acceptance Criteria

AC-1

When a user clicks the **Add to Cart** button for an available product, the product should be added to the shopping cart successfully.

AC-2

The cart icon should immediately display the updated item count after a product is added.

AC-3

If the same product is added multiple times, the application should update the product quantity instead of creating duplicate cart entries (as per business requirements).

Question 5

Choose a Signup or Login test case in JIRA and revise it by adding detailed preconditions, test data, and expected results for both valid and invalid input scenarios.

Answer

Test Case ID

TC_LOGIN_001

Summary

Verify Login Functionality using valid and invalid credentials.

Preconditions

User is registered.

Login page is accessible.

Internet connection is available.

Test database is available.

Test Data

Scenario	Username	Password
Valid Login	saksham@test.com	Test@123
Invalid Password	saksham@test.com	Wrong123
Invalid Email	invalid@test.com	Test@123
Blank Fields	Blank	Blank
Special Characters	@@@@####	@@##\$\$

Test Steps

Open the Login page.

Enter the test data.

Click the **Login** button.

Observe the result.

Expected Results

Scenario	Expected Result
Valid Login	User is redirected to the Home page.
Invalid Password	"Invalid Password" error message is displayed.
Invalid Email	"User does not exist" error message is displayed.
Blank Fields	Required field validation messages are displayed.
Special Characters	Invalid input is handled gracefully without application failure.
